We're Fighting for Fair

Do you remember what the telco environment was like pre 2009? You may have blanked it out. We don't blame you. Before 2degrees, there were no Carryover minutes, texts or data, no data sharing, a standard call was 89 cents per minute, and unlimited certainly wasn't a customer facing word. New Zealand deserved better than that.

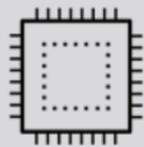

SAMSUNG

Introducing the new Galaxy Note10 | 10+

An on-the-go team needs an always-ready-to-go phone. With features like an intelligent battery to last all day*, the new S Pen that instantly turns handwriting into text, and exceptionally fast performance, the Galaxy Note10 is designed to keep work going anywhere, anytime.

*Requires selection of optimisation under battery settings. Actual battery life varies by network environment, features and apps used, frequency of calls and messages, number of times charged, and many other factors.

The power of performance

The speed to do whatever you need, whenever you want. With a Neural Network Processing unit, 12GB of RAM, and up to 1TB of storage, nothing can hold you back.

The power of productivity

Get more done with a range of work tools. From the new S Pen with accelerator and gyro sensors, to the improved DeX capability, the power of a computer is in your pocket.

The power of defense

Protect your business every step of the way. The Knox mobile security platform securely encrypts all data by default, using a government-certified encryption module.

Galaxy A Series

Maximised business mobility

Achieve more on the Infinity-U Display

The Infinity-U Display means you can enjoy an uninterrupted view wherever you're working. With the near bezel-less FHD+ Super AMOLED screen, Galaxy A series is designed to give you more of what you need.

Keep work safe, keep life separate

If your employees are using the company-issued device for their personal use, you can rest assured everything's safe. The Secure Folder holds sensitive data in a protected area, dividing work from home life.

Capture a wider world

The multi-lens camera captures detailed pictures day and night. Artificial intelligence helps detect subjects and optimises the image based on 19 different scenes. Workers in the field can now easily capture material without the worry of blurry images.

Galaxy XCover 4s

Rugged yet refined design

When work requires you to stay mobile, the new Galaxy XCover 4s is slim enough to fit comfortably in the hand, yet its heavy-duty design allows it to withstand harsh environments in the field.

Built for business, the Galaxy XCover 4s meets IP68 and MIL-STD 810G* standards shielding it from harsh outdoor challenges as well as most indoor office environments like condensation, accidental spills, and dust build-up.

Whether staff are on the factory floor or a construction site, workers from any industry can use the Galaxy XCover 4s to access applications for managing job-specific tasks, such as asset management and factory automation.

*MIL-STD 810G is a standardized form of testing designed by the US Military to accurately assess device limitations. Testing methods include a drop test on a plywood impact surface over concrete from a height of 1.2 meters. Water and Dust Resistant (IP68 rating) means that device is protected against entry of solid foreign objects and harmful ingress of static fresh water at up to 1.5 meters under certain defined test conditions.

Samsung Knox

Next-level security

Keep work and life separate

Samsung Knox security is designed to protect Samsung devices. It allows businesses to create a secure zone on employee handsets, exclusively for corporate applications, while providing a private zone for employees' personal content.

Configure devices from anywhere

You can remotely configure a large number of Samsung devices and tailor them to specific needs with the cloud-based Knox Configure. Profiles can be created with device settings, restrictions, apps, and other content, and enrolled devices will automatically receive them via WiFi and mobile data.

Take control of your fleet

Manage a fleet of devices with a cloud-based EMM solution that increases business efficiency and secure corporate data. Knox Manage can manage most Android, iOS or Windows 10 devices, but is most secure on Samsung Galaxy devices integrated with the Knox platform.

After a new Samsung Galaxy? Call us on 0800 022 249 for more info

Why businesses are choosing 2degrees

Carryover Data

It's hard to predict your business needs from month to month. Which is why on 2degrees, your unused data is yours to keep for up to a year. Plus NZ Carryover Data on our Business Connect Plans applies to your business' shared pool, so it benefits your whole team.

Call and text Aussie at no extra cost

With all of our Business Mobile Plans you can call and text both NZ and Australian mobiles and landlines at no extra cost. Perfect for if you're expanding your business over the ditch or keeping in touch with Aussie-based suppliers.

Business Broadband you can rely on

Our business broadband is super reliable, and choosing a plan is simple. We have two plans - 200GB or Unlimited data, then you just decide what add ons you'd like to include. It's as simple as that.

Fuss-free roaming

When you're overseas you need to stay in touch, and with our roaming packs you can do just that. Plus with our Business Choice L and XL plans your NZ minutes, texts, and data allowances will work in Aussie, just like they do at home - at no extra cost.

No long term contracts

Let's face it, in business things rarely stay the same. All our mobile plans are open term, so if you decide you're not on the right plan you can switch. There's also an open term option for business broadband if you're happy to pay for the modem. It's that easy.

WiFi Calling

WiFi Calling allows you to make and receive calls and texts anywhere in the world that has a suitable WiFi connection, even if there is no mobile coverage. Calls and texts to NZ and Australian numbers simply come out of your Plan - so whether you're overseas or at the bach, if you have WiFi, you have 2degrees coverage.*

FIGHTING FOR FAIR FOR KIWI BUSINESS

Fighting for Fair is our thing at 2degrees, and in business, it's no different. Our smart range of business products and services all run over our nationwide network, and we can give you a full range of business solutions depending on your needs. From mobile to broadband, through to cloud-based service solutions.

Our straight-forward plans make choosing the right one for your business easy. And with no term contracts, a local and approachable customer service team, and a long list of happy customers we're looking after, we're confident we can look after your business too.

The SPCA is just one of our happy customers and here is how we're helping them, help animals in need.

Case study

SPCA

Technology is now playing a key role in ensuring the health and wellbeing of thousands of vulnerable animals each year thanks to the collective smarts of the SPCA and its partnership with 2degrees.

In Auckland, the SPCA switched its mobile and broadband services to 2degrees two years ago and uses the network to not only support its day-to-day operations, but to also provide innovative ways to track animals in need.

"As a charity, our focus is always on getting the most value we can from every dollar we spend,"

says GM Marketing & Fundraising, Dominique Leeming.

"We really like 2degrees' philosophy as a company and the fact that it was really open to supporting us with our ambitious technology plans at the same time as keeping our costs low."

One area where mobility is helping the SPCA make a difference is out in the field.

"Our inspectors spend most of their day out on the road visiting properties where animals are in distress or need urgent care. Their mobiles are a vital tool for this work – especially when they are going in to very remote areas or dangerous situations. We use our mobiles and broadband in unison with

Navman technology which, from a health and safety perspective, ensures our inspectors are supported and can get assistance at any time.

It's also extremely useful for finding animals that need help in remote or hard to find areas. It's sometimes difficult to pinpoint exactly where our inspectors need to go but with the use of our technology run over the 2degrees network, we can guide them to exactly the right location using our tracking technology which cuts down on the time it takes to assist with urgent cases."

Dominique says its partnership with 2degrees is allowing it to do more, for less.

"In our organisation, every cent counts. Not only has 2degrees helped enable our innovative ideas but they have also ensured we get the best value and service for our money."

"We feel well supported by the 2degrees team - which means we can get on with focusing on what's most important - helping those special animals in need."

UNLIMITED MOBILE DATA FOR 10 TEAM MEMBERS

\$35/m PER PERSON

A fair deal

Our Unlimited* Business Choice Plan gets cheaper the more team members you add, up to 10 total users. If you add 9 others, it's just \$35/m per person. You also get Unlimited* Minutes and Texts to NZ & Aussie.

Hotspot enabled

Stay connected by using your data your way. We think it's only fair that hotspotting to your laptop, tablet and other devices is included.

No long-term contracts

We understand that in business things rarely stay the same, so all our mobile plans are open term. If you decide you're no longer on the right plan, you can switch. Easy.

Interest free phones

It's easy to get a new phone on these plans with interest free monthly repayments over 12, 24 or 36 months^.

Business Connect Mobile Plans

Plans with one shared pool of data

One simple shared plan for the mobiles in your business. Whether you have 2 or 200 connections, our Business Connect plan offers you great value and the convenience of one bill.

1 Choose your pool of shared data

Data pool options range from **8GB** to **150GB** of NZ Carryover Data which lasts up to a year.

Talk to one of our team members about your data requirements

2 Add up to 200 connections

Add a mobile connection

Talk & Text Connection[^]

\$26 per month (excl GST)

Access to the team's shared pool of NZ Carryover Data

Unlimited* Calls & Texts to NZ & Aussie

Voicemail included

Landline On Your Mobile

Add a data only connection (e.g. tablet)

Data Device Connection[^]

\$8 per month (excl GST)

Access to the team's shared pool of NZ Carryover Data

*Fair Use Policy applies. Standard landline and mobile calls. [^]When your shared data pool is running low, you'll automatically have 10GB NZ Data added to your account for \$110 (excl GST). This auto top-up data is valid 30 days (i.e. is not NZ Carryover Data) but is used first before any Carryover Data. Your shared data pool's Carryover balance is capped at 200GB. Prices shown for adding mobiles and tablets are per month and per connection. Prices exclude GST.

Roaming

Hassle-free roaming

Our roaming packs give you hassle-free travel to popular destinations.^
Simply choose your destination and how long you're going for.

Data on the go

At just 10c/MB our casual roaming rates are pretty fantastic

Available in selected destinations^

Aussie Carry On

Carry on using your plan in Australia at no extra cost with **Aussie Carry On**

With our Business Choice L and XL plans when you travel to Australia your NZ minutes, texts and data allowances will work there just like they do at home. No huge roaming bill when you get home, no fuss, no worry. So whether it's calling a colleague in Perth from your Sydney meeting or Skyping your kids back in NZ for a bedtime story, you pay nothing extra.

- Use your NZ minutes, texts, and data when roaming in Australia worry free (for up to 90 days in a calendar year)
- Call and text back to NZ at no extra cost
- No need to set up or buy packs before traveling

2degrees Cloud PBX

Seamless voice solutions for your business

Talk to your local Business Sales Consultant to find out if 2degrees Cloud PBX is right for you

2degrees Cloud PBX provides a seamless voice solution, ensuring your customers and your team reach the right people, first time.

Our simple, scalable solution with three cost effective user profiles and range of VoIP phone options will allow you to mix and match to suit your individual business needs.

Lower cost solution

Three cost effective user profiles means you only pay for the features each user needs.

Scalable solution

We can tailor a solution to match the size of your business, from just one to multiple users across a number of sites.

Self-service portal

Your team can manage basic call routing and flows and provide visibility on usage and profile settings.

Supported installation

We'll assign a dedicated Delivery Specialist to look after the end to end install process and support to get you up running.

Cost certainty

With fixed price user profiles, phone leases and add-ons, you'll know exactly what you're paying each month.

Contact your local Business Sales Consultant for full T&Cs and related documentation which apply.
Fair Use Policy as set out in the 2degrees Business T&Cs applies. Excludes any fixed rate calling charges which may apply to your use of Cloud PBX and any charges which you may incur in relation to additional services, hardware, installation, training or changes to your Cloud PBX.

No mobile coverage? No worries.

We're the only network in NZ that lets you use WiFi Calling to make calls when reception is a bit iffy

We love the Kiwi landscape, but sometimes all those rolling hills, gullies and fancy new office buildings can get in the way of great mobile reception.

WiFi Calling is a new service exclusively available in NZ on 2degrees. It allows you to make and receive calls anywhere in the world with a WiFi connection, even if there is no mobile coverage. So whether you're away at the bach, or in the depths of an office building and have a weaker signal, we've got you covered.

The best bits

- **No extra mobile charges, just more coverage**
When you're in NZ, any calls or texts you make while using WiFi Calling come out of your plan allocation as they usually do.
- **Call home while you're overseas**
When you're overseas, it works the same way. Your WiFi calls and texts back home come out of your plan too – as if you are in NZ. Plus there's no charge when you receive a call.
- **It's fuss free**
There's no app to download, and no pack to buy. As long as you have a compatible phone with the latest software, just turn on WiFi Calling in your phone settings, connect to WiFi and get calling or texting.

Some things to know

- **Compatible phones**
We have a selection of phones that support WiFi Calling with more being added all the time. Visit 2degrees.nz/wificalling to see the latest list.
- **Broadband**
If you are using a 2degrees broadband plan to make WiFi Calls we will not charge you for the data you use. If the WiFi you are using to make WiFi Calls is not "free" or connected to an unlimited broadband plan you will incur broadband charges from your broadband provider for the data you use making WiFi Calls. But don't worry! WiFi Calling only uses about 1MB of broadband data per minute, so 1GB of broadband data will give you approximately 1,000 minutes of calling.

To find out more about how WiFi Calling can benefit your business see 2degrees.nz/wificalling

Compatible device and WiFi connection required. T&Cs apply.

NZ international call rates apply, including to all calls made from overseas to destinations besides NZ & Aussie. This includes calls made within the destination you are visiting. WiFi Calling T&Cs apply.
