We've been busy

Do you remember what the telco environment was like pre 2009? You may have blanked it out. We don't blame you. Before 2degrees, there were no Carryover minutes, texts or data, no data sharing, a standard call was 89 cents per minute, and unlimited certainly wasn't a customer facing word. New Zealand deserved better than that.

Why 2degrees for your business

We're serious about business. We keep things simple using fresh ideas to give you smarter business solutions.

The credentials for business

9 years of experience, over 1 million mobile and broadband customers and over 76,000 business users - it's safe to say you're in good hands.

Great value plans and innovative services

Bringing fresh thinking to the market with new, unique products and services that make doing business easier.

Dependable Business Broadband

Broadband fit for business. Plus with us, you'll only pay for what you need with our two simple, great value plans.

NZ based customer service

Local and on hand to help when you need them.

Seamless switching

We work closely with you to ensure your transition is seamless. It's free to keep your current phone number - even the beginning bit.

Our own world-class network

We've invested more than \$670m in our nationwide mobile network and associated infrastructure - and we're not done yet! We have coverage in 98.5% of the places Kiwis live and work with 90% of it covered by 4G.

Digital Transformation Journey

Future-proofing Clutha District Council

Based in Balclutha, the Clutha District Council services their scenic South Otago region and its population of approximately 17,000 residents with a focus on future-proofing the district for growth.

In 2016 the Clutha District Council's IT infrastructure needed future proofing too - it hadn't been at the top of the agenda for some time. With new stakeholders coming onboard, including ICT Manager Schalk Breytenbach, there was a desire to move the local government agency into the digital age. This meant starting with the basics to build a viable platform that could take them on a digital transformation journey.

Schalk explains how from the outset of the discovery process 2degrees stood out from the crowd.

“The level of engagement was so much higher than what we received from the competitors. They understood the journey we needed to go on and provided the thought leadership and forward thinking to guide us in the right direction.”

Since engaging with 2degrees Clutha District Council has built a completely new platform implementing WAN, Mobile, Managed Network and most recently, Managed Voice.

This gives us the capability to focus on improving our services and delivering more to the community.”

“2degrees have made it easier for us to do business. Our people were stuck in the dark ages with an outdated paper-based system. Because the new technology has been implemented so seamlessly our people have embraced the tools and platform we have delivered on a day to day basis – moving towards being a true digital workforce.”

Schalk says 2degrees has continued to impress beyond the sales and transition process. “The difference with 2degrees is the personal investment. There are always going to be challenges but it's how they are dealt with that makes the difference. Each time we have an issue 2degrees comes to the party. Recently we lost our entire system during a civil defence exercise - it was 10pm at night and with a simple phone call we had the network back up and running within half an hour.”

Now Clutha District Council has the backbone up and running the future is their oyster. “We have come from really far behind and caught up with everyone else.”

“2degrees has worked with us to build a personal trust relationship to carry our vision forward. We now have a flexible, scalable, dependable platform to pursue new technology and take us into the future.”

What you'll love about us

Carryover Data

It's hard to predict your business needs from month to month. Which is why on 2degrees, your unused data is yours to keep for up to a year. Plus NZ Carryover Data on our Business Connect Plans applies to your business' shared pool, so it benefits your whole team.

Call and text Aussie at no extra cost

With all of our Business Mobile Plans you can call and text both NZ and Australian mobiles and landlines at no extra cost. Perfect for if you're expanding your business over the ditch or keeping in touch with Aussie-based suppliers.

Business Broadband you can rely on

Our business broadband is super reliable, and choosing a plan is simple. We have two plans - 200GB or Unlimited data, then you just decide what add ons you'd like to include. It's as simple as that.

Find out more online or talk to your local Sales Consultant

Fuss-free roaming

When you're overseas you need to stay in touch, and with our roaming packs you can do just that. Plus with our Business Choice L and XL plans your NZ minutes, texts, and data allowances will work in Aussie, just like they do at home - at no extra cost.

No long term contracts

Let's face it, in business things rarely stay the same. All our mobile plans are open term, so if you decide you're not on the right plan you can switch. There's also an open term option for business broadband if you're happy to pay for the modem. It's that easy.

WiFi Calling

WiFi Calling allows you to make and receive calls and texts anywhere in the world that has a suitable WiFi connection, even if there is no mobile coverage. Calls and texts to NZ and Australian numbers simply come out of your Plan - so whether you're overseas or at the bach, if you have WiFi, you have 2degrees coverage.*

fit for business.

2degrees Cloud PBX

Seamless voice solutions for
your business

**Talk to your local
Business Sales
Consultant to find out if
2degrees Cloud PBX
is right for you**

2degrees Cloud PBX provides a seamless voice solution, ensuring your customers and your team reach the right people, first time.

Our simple, scalable solution with three cost effective user profiles and range of VoIP phone options will allow you to mix and match to suit your individual business needs.

Lower cost solution

Three cost effective user profiles means you only pay for the features each user needs.

Scalable solution

We can tailor a solution to match the size of your business, from just one to multiple users across a number of sites.

Self-service portal

Your team can manage basic call routing and flows and provide visibility on usage and profile settings.

Supported installation

We'll assign a dedicated Delivery Specialist to look after the end to end install process and support to get you up running.

Cost certainty

With fixed price user profiles, phone leases and add-ons, you'll know exactly what you're paying each month.

After a new phone?

12, 24 and 36 month
interest free options now
available to suit any budget

Interest free options apply to phones over \$199.

Business mobile plans made easy

We've made picking a mobile plan for your business nice and easy. All our plans have Unlimited* Calls and Texts to NZ and Aussie, are open term (yes you read that right – no long term contracts) and have NZ Carryover Data that lasts for up to a year. So you just need to decide if you want a shared bucket of data for your team or individual amounts, then pick the data amount. Simple right?

It's easy to
bring your

International Chat Pack

Same plan, different country

Carry on using your plan in Australia at no extra cost with **Aussie Carry On**

With our new Business Choice L and XL plans when you travel to Australia your NZ minutes, texts and data allowances will work there just like they do at home. No huge roaming bill when you get home, no fuss, no worry. So whether it's calling a colleague in Perth from your Sydney meeting or Skyping your kids back in NZ for a bedtime story, you pay nothing extra.

- Use your NZ minutes, texts, and data when roaming in Australia worry free (for up to 90 days in a calendar year)
- Call and text back to NZ at no extra cost
- No need to set up or buy packs before traveling

Roaming Packs

Fuss-free roaming

We know that as Kiwis, staying in one place isn't in our nature. We're wanderers, and business isn't always taking place in our own backyard. Our roaming packs give you fuss-free travel to popular destinations. Simply choose your destination and how long you're going for.

Aussie Roaming Packs

\$15	\$20	\$35
225MB	500MB	1GB

We'll keep your business online, all the time

If your business broadband happens to go down, we'll add 50GB of free data to your mobile to see you through

**Sign up online: 2dm.co.nz/businessbroadband
or call 0800 022 249**

1. Choose the right amount of data for your business

200GB

\$90 per month
(excl GST)

If your business is a relatively low data user this plan will do the trick.

UNLIMITED

\$110 per month
(excl GST)

If your business data requirements are high, or fluctuate each month, this plan will give you flexibility.

2. Check what connection is available

We'll give you the best connection available (ADSL, VDSL or Fibre) at your address at no extra cost.

3. Build your own package

Phone line

From

\$10 per month
(excl GST)

Unlimited* Calling

Packages from

\$25 per month
(excl GST)

Landline and mobile

Fibre Speed Boost

\$30 per month
(excl GST)
200/200Mbps

Toll Free Service

from

\$7.50 per month
(excl GST)

*Fair Use Policy applies. Standard landline and mobile calls. Stated speeds are based on theoretical maximums and actual speeds will vary. Standard fibre connection is up to 100/100Mbps. Additional charges may apply to non-standard installations and changes to Connections/Services. Add-ons recur monthly until stopped. Fibre Speed Boost removal fee of \$43.48 (excl GST) applies. Early termination charge applies to fixed term Plans. See 2degreesmobile.co.nz/termsfuse/broadband/business for full terms.
